

Assignment #1: Personal Portfolio Site

Subject Code	MIS 311
Subject Name	Introduction to Business Analytics
Assessment Title	Assignment #1: Personal Portfolio Site
Assessment Type	Individual Assignment
Requirements	GitHub Profile and Portfolio
Weighting	20%
Submission	via Moodle
Due Date	To be confirmed

This assignment is designed to develop your practical skills in data analysis and professional online presence. It is divided into two key components:

Part 1: Data Analysis and Insight Generation

You will be provided with several datasets demonstrating the use of data and analytics in business contexts. Your task is to select **ONE** dataset to analyse and uncover insights. You may use any analytical tools, such as Excel, Power Query, or Python to conduct your analysis.

Part 2: Professional GitHub Portfolio

Building upon your data analysis, you will create a personal portfolio on GitHub, a platform widely used to showcase technical projects. Beyond simply presenting your results, this portfolio is intended to be a living document that evolves throughout your EIU journey, reflecting your growing expertise in analytics. You are encouraged to infuse your unique personality and creativity into your portfolio, making it a compelling representation of your capabilities and interests.

Assignment Objectives

- To demonstrate the ability to conduct thorough Exploratory Data Analysis (EDA) and prepare data for deeper analysis.
- To interpret data findings in the context of business analytics and derive meaningful conclusions.
- To develop a professional portfolio profile that effectively communicates your skills, interests, and personal brand.

Instructions

Part 1: Data Analysis and Insight

In this task, you will perform **Exploratory Data Analysis (EDA)** on the dataset you selected. The goal is to understand the dataset's structure, identify patterns, relationships, and potential insights, and prepare it for deeper analysis. Your EDA process should be thorough and well-documented, focusing on both numerical and visual exploration.

1. Data Overview

- Provide a brief description of the dataset including sources of the data, number of rows and columns, the context or background of the data.

2. Data Cleaning

- Identify missing values and decide how to handle these missing values
- Identify any duplicate rows and remove duplicate rows if necessary

3. Descriptive Statistics

- Perform descriptive statistics to summarise the main characteristics of the data and draw meaningful insights. Your goal is to provide **TWO** key insights based on the descriptive statistics. Each insight should be 2-3 sentences long and explain the significance or implications of your findings.
- You might need to use appropriate visualisation to present your descriptive statistics.

Part 2: Professional GitHub Portfolio

1. Create GitHub profile

- Create a GitHub account (if you don't already have one)
- Upload a professional-looking profile picture.
- Write a professional bio that highlights your skills and interests. Your bio is a sentence or two that appears under your profile picture.

2. Finding Inspiration on GitHub

- Follow the following organisation pages:
 - BBS-Business-Analytics
 - BusinessAnalytics-Concentration
- Star at least **TWO** repositories that align with your interests
- Folk **TWO** repositories to your profile that align with your interests

3. Create Repositories

- Create the following repositories with a README file:
 - MIS 311
 - MIS 301
 - MIS 315
- Under repositories MIS 311, showcase the project that you have done in “*Part 1: Data Analysis and Insight*”

4. Submission Format

- Submit the URL of your portfolio through Moodle, using Submission Template provided on Page 5 of this document. Ensure that your file is named in the following format: **MIS311_Portfolio_YourName**

Grading Criteria

Follow the Marking Rubric on Page 4 of this document for details.

Referencing

Reference and in-text citations, please use APA 7th Reference Style.

Late work

Late submissions of assignments without special consideration or extension will be automatically penalised at a rate of 10% of the total marks available per day late. This will be deducted from the assessed mark. If the assignment is delayed by more than 3 days past the submission deadline, student will automatically receive a 0 for the assignment.

Portfolio Site Marking Rubric

Criteria	Weight (%)	Excellent (90-100)	Good (70-89)	Fair (50-69)	Needs Improvement (0-49)
Data Cleaning and Preparation	20	Provides clear and accurate data overview; missing values and duplicates handled thoroughly and appropriately; dataset is clean and well-prepared for analysis.	Provides a clear overview; missing values and duplicates mostly handled correctly with minor issues; dataset is generally clean.	Basic overview: some attempt at handling missing values or duplicates, but issues remain; partial data preparation.	Incomplete or unclear overview; little or no attempt to handle missing data or duplicates; poor data preparation.
Data Analysis and Insight	40	Presents two clear, relevant insights with strong explanation; descriptive stats are well-used; visualisations are appropriate, accurate, and effectively support the findings.	Presents two insights with reasonable explanation; descriptive stats mostly appropriate; visualisations are adequate and somewhat support the findings.	Insights are vague or underdeveloped; descriptive stats used with limited interpretation; visualisations present but not well-matched to insights.	Insights missing or unclear; poor or missing use of descriptive stats; visualisations absent or irrelevant.
GitHub Portfolio Quality	40	GitHub profile is complete (photo, bio, follows, stars, forks); repositories are properly named and structured with clear README; project is well-presented and professional.	GitHub profile mostly complete with minor gaps; repositories created, and project included with some structure; README and presentation are acceptable.	Incomplete GitHub profile; basic repository setup; README or project presentation is limited or unclear.	GitHub profile missing or poorly completed; project not uploaded or disorganised; no README or explanation provided.
